

MUHAMMAD ABDULLAH KHAN

MERN Stack Developer

Lahore, Punjab | +92-307-5601013 | abdullah5601013@gmail.com | [linkedin.com/in/Abdullah-khan-126122227](https://www.linkedin.com/in/Abdullah-khan-126122227)

PROFESSIONAL SUMMARY

MERN Stack Developer with 1+ year of professional experience building and deploying scalable, production-ready applications. Strong expertise in React, Next.js, Node.js, TypeScript, NestJS, SQL, Socket.io, and CI/CD-based deployments on Fly.io, Vercel, and Netlify. Experienced in end-to-end full-stack development, database optimization (indexing, triggers, query tuning), and implementing deep linking for high-performance applications.

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Iris Labs | March 2026 – Present

- Building scalable backend services using NestJS and TypeScript with modular architecture and dependency injection.
- Designing and implementing RESTful APIs with JWT-based authentication and role-based access control.
- Creating type-safe DTOs and data models using TypeScript interfaces and class-validator for robust request validation.
- Integrating TypeORM with PostgreSQL for structured schema management and efficient relational data querying.
- Applying NestJS interceptors, pipes, and exception filters to enforce consistent API behavior and error handling across services.

MERN Stack Developer | Waywe Gaming, Lahore, Pakistan | April 2025 – March 2026

- Developed a full-stack HRM system from scratch with role-based access using React, Node.js, Sequelize.
- Built a game backend with Socket.io & APIs and a React-based dashboard for managing role-based game stats.
- Migrated backend to Fly.io and implemented CI/CD pipelines with GitHub Actions.
- Integrated deep linking for referrals and Facebook authentication.

MERN Stack Intern | A4H, Bolton, UK (Remote) | September 2023 – January 2024

- Developed responsive user interfaces using React.js with focus on component reusability and maintainability.
- Built backend APIs using Node.js and Express.js for data handling and authentication systems.
- Implemented secure authentication systems and optimized application performance.
- Worked in agile development environment delivering projects within deadlines while gaining experience in international remote collaboration and project management.

EDUCATION

Bachelor of Science in Computer Science

University of Central Punjab, Lahore | 2021 – 2025

CERTIFICATIONS & TRAINING

Software Trainee | Integriti, Lahore, Pakistan | February 2025 – April 2025

- Developed and maintained responsive user interfaces using React.js with modern component architecture ensuring 100% responsive design across multiple devices and screen sizes.
- Contributed to backend API development using Node.js and Express.js frameworks, handling data requests, authentication, and business logic implementation.
- Collaborated with cross-functional teams to deliver high-quality web applications ensuring scalability and security.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, Responsive Design

Backend: Node.js, Express.js, NestJS, TypeScript, RESTful APIs, WebSocket

Database: MySQL, PostgreSQL, Sequelize ORM, TypeORM

Languages: JavaScript, TypeScript, Python

AI & ML: Generative AI, LangChain, LangGraph

DevOps: Git, GitHub Actions, CI/CD Pipelines, Docker, Fly.io, Vercel, Netlify, Render, Railway

KEY PROJECTS

DEF — Emotion-Based Movie Recommendation System (Final Year Project) — *Technologies: React.js, Node.js, Express.js, Sequelize, face-api.js, MySQL*

- Built real-time emotion detection system for personalized movie recommendations using facial recognition technology.
- Implemented dynamic sentiment analysis, OTP-based authentication, cloud video management, and AI chatbot integration.
- Achieved 85% emotion detection accuracy through machine learning algorithms and facial analysis.

Company Portfolio Website — *Technologies: Next.js, React.js, Tailwind CSS, JavaScript*

- Developed professional company portfolio website with server-side rendering and SEO optimization.
- Implemented dynamic content management, contact forms, and performance optimization delivering 40% faster load times.
- Successfully migrated three Node.js backend applications from Heroku to Fly.io and implemented CI/CD pipelines using GitHub Actions.

Car Management System — *Technologies: React.js, Bootstrap, Node.js, Sequelize, MySQL*

- Developed comprehensive car management platform for fleet operations and driver administration.
- Implemented driver registration, vehicle tracking, expense management, and detailed driver profile systems.
- Built automated reporting features and real-time expense tracking improving operational efficiency by 35%.

Semantic Document Summarizer — *Technologies: React.js, Node.js, Express.js, PostgreSQL, NLP Models (BART, DistilRoBERTa, Falcon-7B)*

- Developed AI-powered document processing platform utilizing multiple NLP models for advanced text analysis.
- Implemented automated summarization, emotion analysis, and interactive chatbot functionality achieving 90% summarization accuracy.
